iphone ipad hardware verification report Software 3utools. If you looking for a software for checking hardware in iOS devices this software is the one you looking for **3utools** version 2.2. You can check your iOS device's hardware using this tool windows software. You can use iPhone, iPad and ipod to find an issue that would warrant running the diagnostic. This software also let you shutdown restart or

Search the site

restore your iOS.

Start the diagnostic process. the software will start verification report. The link opens the iOS diagnostic tool, which requires you to click through a legal agreement before starting the test. The test results are sent back to you once they finish and you tap “done”. Back on the support site the page will refresh and show any issues that were found with the device as well as support options for resolving them.

This iPhone ipad hardware verification report is very similar to the **purplerestore** software official apple software for

- **List of Tests Include:**
