

Pro Display XDR Calibrator 1.0.0

[Download](#)

Every Pro Display XDR undergoes state-of-the-art factory calibration with laboratory grade instrumentation. Pro Display XDR Calibrator enables in-field recalibration of Pro Display XDR for specific color workflows that may require custom calibration. Recalibration with this utility requires one of the following spectroradiometers:

- Photo Research SpectraScan PR-740, PR-745 or PR-788
- Colorimetry Research CR-300

Additional Requirements:

- macOS 10.15.6 or later
- Pro Display XDR with display firmware v.4.2.37

For more information on in-field recalibration, see [Measuring and calibrating Apple Pro Display XDR](#)

Post Date: Nov 4, 2020

File Size: 1.4 MB

System Requirements

macOS 10.15.6 or later
