

How to clean the nano-texture glass on your Apple display

If your Apple Studio Display, Apple Pro Display XDR, or iMac has nano-texture glass, follow these important guidelines to prevent damage when cleaning the screen.

Clean the nano-texture glass

To remove dust or smudges from the nano-texture glass screen, use only the polishing cloth that came with your Studio Display, Pro Display XDR, or iMac.

For infrequent cleaning of hard-to-remove smudges, you can moisten the cloth with a 70-percent isopropyl alcohol (IPA) solution.

Never use any other cloth to clean the nano-texture glass. If you lose the included cloth, you can [order a replacement polishing cloth](#).

Clean the polishing cloth

1. Hand wash the polishing cloth with dish soap and water.
2. Rinse thoroughly.
3. Allow the polishing cloth to air dry for at least 24 hours.
