

How to Easily Recover Deleted App Data on Android?

Are you experiencing a situation where you deleted an app and all the data related to the app is also lost somehow? Now, if you want to recover the deleted app data on the Android phone, you can do it easily with a few simple and easy techniques.

Joy Taylor Last Updated: Jun. 22, 2022

Every single app on the Android Device saves the data in two places. One place is the phone storage and another is the app server. The data that is saved on the phone storage will be removed when you delete the app from your device. But from the server storage, the data never gets deleted. Nevertheless, when you [accidentally deleted your apps](#), you still have an option to recover your app data. In the article, we have described 3 methods that would allow you to recover your deleted app data on Android devices with or without backup.

- ▶ [How to Recover Deleted App Data on Android from Backup?](#)
- ▶ [How to Recover Deleted App Data on Android without Backup?](#)
- ▶ [How to Recover Deleted App Files on Android without Backup?](#)

How to Recover Deleted App Data on Android from Backup?

[Creating a backup of all the files and data on the Smartphone](#) has become a habit for most users. So if you had a backup of your Phone data, then you don't need to worry about getting back your phone data. In this method, we are going to tell you the steps to restore the deleted app data from the backup.

Recover Deleted App Data from Backup

1. Open the settings and choose the “Backup and Reset” option.
2. In the Backup and Reset, ensure that you had the “Automatic restore” open enabled.
3. Go to the app store and search the app whose data is deleted and then tap on install.
4. When the app is getting installed, it will ask you to restore the previous backup file, and you only have to click on yes and all the data of that app will be restored to your device.

If you didn't have any backup of your phone data, you can follow up with the next 2 methods to recover the app data from your device.

How to Recover Deleted App Data on Android without Backup?

It's really troublesome to recover deleted app data without any backup. In this case, we would like to introduce to you the professional Android data recovery – [PhoneRescue for Android](#), which has helped 5700000 Android users successfully retrieve their deleted or lost data.
