EDIT PREFERENCES

**With E-TUBE PROJECT**

# With E-TUBE PROJECT Cyclist, the fun starts before the ride begins.

- Check the remaining battery level and the latest firmware update.
- Select the shift mode settings from three options, including standard shift, SHIMANO SEMI-SYNCHRONIZED SHIFT, and [SYNCHRONIZED SHIFT](#).

[> SYNCHRONIZED  
SHIFT SETTING\(0:19\)](#)

- Set up or change switch functions to customize your experience.

# Supercharge your trail riding with customized settings.

- Find the ideal balance of assist torque and pedaling input torque to match how you like to ride.
- Adjust the assist maximum torque to the trail conditions.
- Then, complete the assist character setting by optimizing assist output speed. Switch between preset profiles to enjoy e-MTB riding.

**Experience a much  
more intuitive ride  
with your personal  
power assistant**

Power adjustment / customization

[> How to customize e-bike assist characteristics\(0:22\)](#)

## Enjoy every ride in any condition with customized e-bike settings.

- You can change the default AUTOMATIC SHIFT timings with the app if you prefer the shift timing to happen sooner or later than the default settings.
- Ride with confidence, even through a busy city full of traffic lights, since it automatically shifts while you coast to a stop and puts you in the optimal start

gear for when you get going again.
