## Software

### VictronConnect

Use the VictronConnect app to configure, monitor, update and diagnose your Victron product. It can connect to Victron products via Bluetooth, USB and WiFi/LAN/Internet.

See the [VictronConnect product page](#) for more information.

## VE Configuration tools for VE.Bus Products

This package contains:

- VEConfigure 3 (v9004234)
- VE.Bus Quick Configure (v9010153) - For installations up to 3 Multis
- VE.Bus System Configurator (v9009152) - For larger installations
- VEFash (v9005162) - Firmware update tool to update VE.Bus products

To connect your computer to a VE.Bus product (Multis, Quattros and Inverters), you need a driver for MK2-USB (ASS030130000) / MK3-USB (ASS030140000) and an RJ45 UTP cable (ASS030064xxx and ASS030065xxx).

### USB driver installation program for MK2-USB / MK3-USB

To install the MK2-USB / MK3-USB driver on a computer without internet, first download the MK2-USB / MK3-USB driver using VEConfig3 and install it by selecting the menu Special -> USB Drivers. Only afterwards connect the MK2-USB / MK3-USB to your computer for the first time.

On computers with internet, Windows will automatically download the correct driver itself.

VE Configuration tools
