VictronConnect App

Monitor, operate & configure

Use the VictronConnect app to configure, monitor, update and diagnose your Victron product. Available for Android, iOS, Windows, and macOS X.

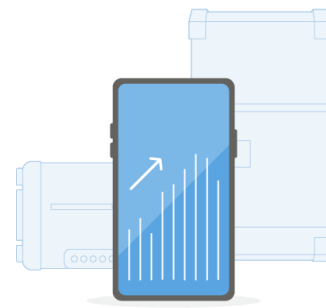

It can connect to Victron products via Bluetooth, USB and WiFi/LAN/Internet.

Monitor

Real-time insight, complete control

Get real-time and historical data of any Victron product via Bluetooth, USB or your local area network via your GX Device. VictronConnect works on your iOS and Android phone as well as on your laptop on Windows and Mac, all through an intuitive and clean interface.

Operate

Control your devices with ease

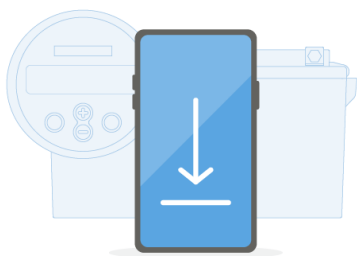

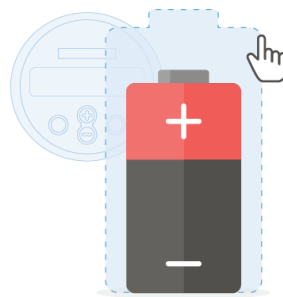

Aside from monitoring, you can also operate your device. Easily control the shore power input current limit or switch on your inverter using the VictronConnect app. Together with our VE.Bus Smart dongle, this is an ideal entry level user interface for a complete RV or Marine Victron system.

Configure

Configure

VictronConnect is the perfect tool for installers to quickly and efficiently configure a system after wiring it.

Firmware updates

Safe and easy firmware updating

With VictronConnect, it's safe, quick and easy to perform a firmware update of Victron products. No internet connection is required; and no files need to be selected or downloaded. Just connect to the product.

VictronConnect

VictronConnect lets you get live status information and configure any Victron products which either have Bluetooth built-in, or are connected to a VE.Direct Bluetooth Smart Dongle.
