We can download the IPSW file from the direct link by using iTunes as an alternate technique. iOS users are using iTunes to download IPSW files for specific cases like interrupted network (Direct download may be stopped at any point and it will not restart again from the stop), Not have enough knowledge about Download file from Apple server in Browser then restore iPhone using iTunes step by step. Default iTunes ipsw file location is the same on one platform.

Different OS systems Stored IPSW files in different places; here, I will show you how to Find IPSW file locations on Sierra, El Capitan, or Windows.

in this article, I will guide you to fix *Could not activate cellular data network. You are not subscribed to a cellular data service.* Wi-Fi alternative **cellular data** supported Apple iPhone and iPads are cool gadgets to connecting to the internet. You guys, you familiar that the internet has become a habitual thing for almost each and every people. All Smartphone users needed the internet to access App's with better features and to stay up to date. For that, generally, folks are using Wi-Fi (Wireless Fidelity) on its smart handset or tablet. Perhaps, everywhere Wi-Fi won't able to get, at that time alternative Personal Hotspot and Cellular/ Mobile data is the better option. This cellular-data

is driven by SIM card provider carrier companies such as USA Flagship **AT&T**, Verizon, **T-Mobile**, Sprint, **Straight talk**, and many other networks globally.

A big profit of the cellular data plan is that the user can access the internet and Google anywhere and handy to use. It doesn't matter, you're on an international tour (if your international data roaming SIM Card). For example, if you go overseas and then you reached your hometown. And whenever you're trying to turn on cellular data. But might you address the unwanted error "**Could Not Activate Cellular Data Network** on iPhone or iPad"? Don't worry.

Here's complete solution for latest

iOS running **iPhone 12**

Pro/Max/Mini, iPhone 11 (Pro

Max), iPhone SE/ 5S/ iPhone 6/6

Plus, iPhone 6S/ 6S+ and iPhone

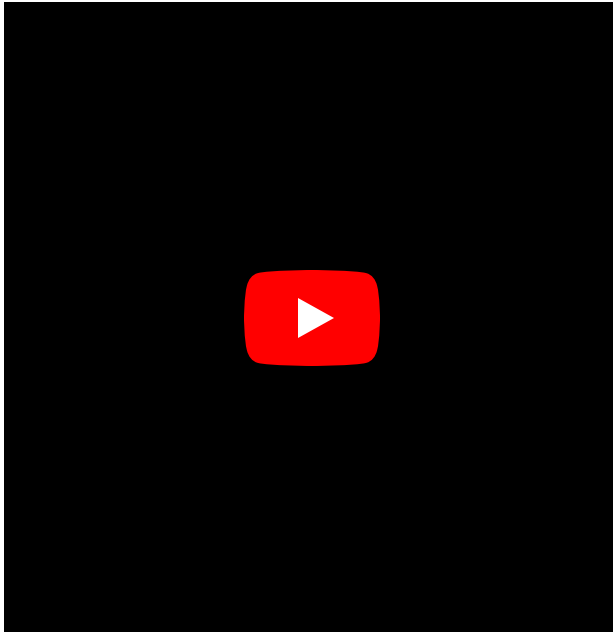

7/7 Plus/ *iPhone 8 Plus/ iPhone 8/*

iPhone X, XS Max, XS, XR, 11 pro

Max and Wi-Fi + cellular iPad.

Get Rid of Could Not Activate Cellular Data Network on iPhone and iPad

**Video guide why cellular
data not working on iOS**

Fix 1. Turn off/ Delete VPN Settings on your iPhone/ iPad

In most cases, **VPN profile settings** messed up to access cellular data on the cell phone or cellular iPad tablet. Therefore, you should confirm that there isn't any profile listed in **VPN settings**. Even any Profile listed then delete first. If you're not tech-savvy. Feel free. lets a close look at the given below steps and get rid of the problem.

- **Step 1.** Go to **Settings App** – then **General**.

Turn off VPN on iPhone settings

- **Step 2.** Tap **VPN** (any profile exists) – **Delete Profile** – if there isn't then go on the next clue.

Remove VPN or Delete VPN Profile on iPhone

Clear profile sections and then **restart your iPhone** or iPad.

Generally, this answer excludes the

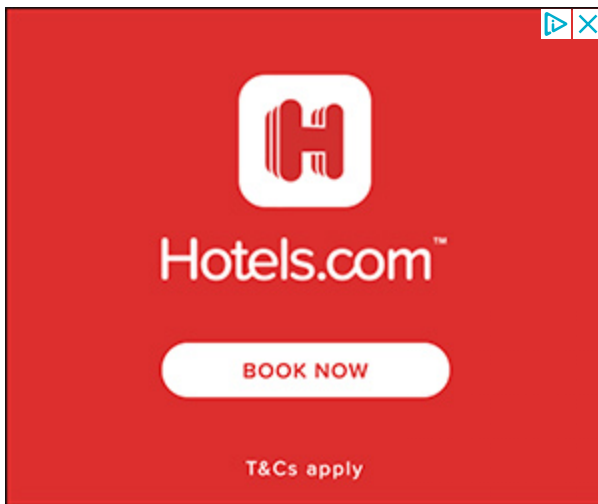

issue of Could Not Activate Cellular Data Network – You are not **subscribed to a cellular data service**. Persist the same error. Please keep continuing.

Also, Follow the below fixes,

- Turn toggle off and turn on again after wait a few seconds about 40 or a minute
- Remove all the Profiles, Outdated or in Use, Note down all the important profiles to reinstall after test your problem. Go to the ***Settings app > General > Scroll to Profile > Tap on Profile name > Delete.***
- Update Carrier settings, Go to the ***Settings app > General > About.*** [Pending Update popup

will see here]. Tap on the Update option.

- Disable and Enable LTE Data,
Go to the Settings app on iPhone > Cellular/Mobile Data > Cellular/Mobile Data Option > Enable LTE

Note: Sometimes users gets **could not activate cellular data network PDP authentication failure error** – PDP (Packet Data Protocol) is network related. Network provider uses PDP. Don't worry, it's common, let's follow the bottom given solution to fix the issue.

Fix 2. Reset Network Settings on your

iPhone/ iPad Air, iPad Mini

Go to the ***Settings app > General > Reset > Reset Network Settings.***

Get more here to [Reset Network Settings on the iPhone or iPad.](#)

After that, restart your iPhone, then turn on cellular data and launch the browser to searching something. Mostly this way does work to fix the problem or could not activate mobile data on the Apple iPhone.

For those guys, who didn't get the fix. Please try the bottom given two potential workarounds.

Fix 3. Turn On/ Turn Off Airplane Mode and Check Out

Launch **control center** and turn Airplane mode on and then Off. Now wait for 30 seconds and check out for cellular (mobile) data

settings.

Fix 4. Check out the Carrier Settings Update

If any update available, please do the Update Carrier Settings first.

Did you ever try to put out the Nano SIM card from the SIM tray then insert it again?

At least try once. By chance, it will be work.

Hey friends, let us know, from the above list, which way is helpful to **receive mobile/Cellular data services** on your Apple iPhone or cellular iPad models.
